

iscoord ag

A leading provider of integrated, certified and open softphone solutions

iscoord started developing softphones in 2004. is-phone is a **unified communications solution** which is **integrated** in leading collaboration platforms from IBM and Microsoft and features enhanced functionalities, such as **audio and video conferencing** or toolbar access. It is **certified by major PBX vendors** and open in extending into business applications and **SaaS environments**. is-phone does not require middleware components or additional servers. In addition to the IBM and Microsoft softphones, iscoord developed is-phone click2connect for browsers and is-phone for iPhone. The iscoord product range is distributed through a worldwide partner network, direct sales or **OEM** relationships. Our advisory team is the preferred independent consulting partner for entrepreneurs, executives, board members and other decision-makers for Information Technology strategy.
